For Immediate Release

The Energy Telecommunications & Electrical Association Announces Successful Fall Seminar Series in Denver, CO

DALLAS – November 1, 2009– The Energy Telecommunications & Electrical Association (ENTELEC) is pleased to announce the success of the first Fall Seminar Series in over ten years. The event was held October 21-22 at the Inverness Hotel & Conference Center in Denver, CO was attended by a variety of attendees and exhibitors.

Over 30 exhibiting companies showcased their products and services to the ENTELEC attendees during the two-day conference. The conference also featured seminars related to the conference single topic theme “The Integrated Field of the Future”. The goal of the Fall Seminar Series was to provide solutions to current problems facing attendees.

“The attendees were thrilled with the one-on-one time they had with suppliers,” says Blaine Siske, ENTELEC Executive Director. “The smaller, more intimate event allowed the attendees the opportunity to seek solutions for their challenges.”

New to the ENTELEC schedule was the launch of the “Vendor Shoot-Out”. Eight companies (Sunwise Technologies, Exalt Communications, Winn-Marion, Qwest Technologies, Cal Amp, GE MDS, Uplogix and Control Systems International) represented their products during the two-hour panel discussion. Attendees were allowed to ask questions about the products and services provided by each supplier. The standing room only audience engaged in open discussions with both the panelist and each other.

“The open dialog between the suppliers and attendees provided a great opportunity to discuss problems and solutions in our daily work environment,” stated Dan Mueller, ENTELEC’s Second Vice-President and moderator of the Shoot-Out. “We have been asked by both vendors and attendees to hold another Shoot-Out in Houston in the spring. We’re looking forward to continuing our dialog in 2010.”

The 82nd Annual ENTELEC Conference and Expo will take place April 13-15, 2010 at the George R. Brown Convention Center in Houston, TX.

About ENTELEC

ENTELEC is a user association that focuses on communications and control technologies used by petroleum, natural gas, pipeline and electric utility companies. ENTELEC's primary goal is to provide education for its members. To achieve this goal ENTELEC provides an educational platform for these industries, including technical presentations, equipment exhibits and networking opportunities during the annual ENTELEC Conference & Expo. Technological advances in SCADA systems, networking, communications, automation, and leak detection are discussed at each annual event. For more information, visit www.entelec.org
