Quorum Completes First Phase of PGAS Implementation for SemCAMS

Calgary – January 6, 2009. Quorum Business Solutions, Inc. (Quorum), a leading provider of business and information technology solutions for the oil, gas, and renewable energy industry, announces that it has completed the first phase implementation of the *Quorum PGAS* measurement solution for SemCAMS. This implementation represents the first installation of *PGAS* in Canada.

As part of the initial phase, comprehensive gas and liquid analysis capabilities were developed, including third-party lab interfaces, inbound analysis validation, and non-compliant analysis escalation. The analysis interfaces allow for automated data transfers from all major laboratories, reducing manual input and increasing data integrity. Furthermore, gas and liquid analysis management enables clients to automatically validate 100 percent of samples and flags outlying exceptions based off of historical data for closer scrutiny.

“Quorum's collaboration with SemCAMS to understand the Canadian requirements for gas measurement resulted in a powerful PGAS product that will enable SemCAMS to improve the timeliness and quality of its measurement data,” said Dayle Chadbourne, SemCAMS vice president of customer service and measurement. “This, coupled with their knowledgeable employees, made them a good fit for our business needs.”

SemCAMS is one of Alberta's largest licensed sour gas processors with facilities located in Whitecourt and Fox Creek, AB. SemCAMS three sour gas (H₂S) processing plants license capacity ranges from 9,000-19,000e3m³/d(300-700 MMSCFD) to 1,000-2,000t/d sulphur. SemCAMS is an integral part of the SemGroup family, headquartered in Tulsa, Oklahoma. For more information, visit www.semcams.com.

About Quorum Business Solutions, Inc.

Quorum Business Solutions, Inc. is a software and consulting solutions company that develops, implements, and supports a suite of business software solutions for the energy industry with a unique approach to providing a longer product life span. Founded in 1998, Quorum employs over 300 staff operating out of offices in Calgary, Houston, and Dallas. Quorum has ongoing relationships with over 90 clients, among which 25 Fortune 500 Companies are represented. Throughout its ten year history, Quorum has successfully completed over 400 business and information technology projects.

The Quorum Energy Software Suite is a set of integrated business applications designed for companies that produce, gather, transport, process and market oil, natural gas, natural gas liquids, LNG, wind generation and other energy commodities. The inherent integration of the suite allows the products to work together to facilitate straight through processing of the full energy value chain.
