

# **iNet + STARLINK**

## LEO Satellite Communications Solution

### Expanded Connectivity for Oil & Gas Operations

iNet is now providing energy industry operators with high-availability, high-speed, low-latency communications without the high cost of fiber connectivity. As an authorized **Starlink™** technology integrator, iNet offers improved portability to field operations for upstream and midstream oil and gas. Integrated with iNet's private 4G/5G LTE networks, it's the fastest, most secure and reliable remote communications solution to the energy industry.

### Integrated Field Site Functionality

iNet + Starlink provides remote field sites with localized and integrated 4G/5G and WiFi broadband connectivity for industry-leading data and voice services, allowing you to efficiently and effectively upgrade and manage field communications.

### Fast, Secure, and Reliable

- > High-capacity connectivity without the high cost of fiber
- > Enables remote communication solutions for drilling and production, midstream and construction
- > Up to 500 Mbps download and 40 Mbps upload speeds
- > Integrated with iNet's inView Fleet Management Portal
- > Backed by iNet's private and secure LTE network

**The fastest, most reliable internet available to the energy industry.**

**Connect with iNet today and put the power of Starlink to work for you!**
