

Private LTE is just the start. One multi-access network helps organiza- tions digitalize their field operations and save millions of dollars a year.

Get reliable 24/7/365 remote communications. And you don't have to build a thing.

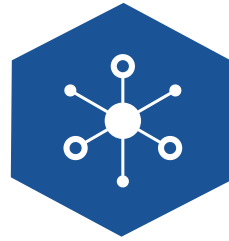

End-to-End Communication Solutions

iNet provides expertise, equipment, installations and maintenance with our field support teams, and oversight with our 24/7 network operations team. We provide everything you need.

Ready-Build 4G/5G LTE Network & VSAT

iNet owns the largest private 4G/5G LTE network dedicated to oil and gas. Covers over 130,000 square miles in the Permian, Bakken, Eagle Ford, Scoop/Stack) with VSAT backhaul.

Future-Proofed IIoT Solutions

We enable IIoT like monitoring sensors for more efficient drilling and production operations, and real-time equipment and resource tracking to increase productivity and security.

24/7 Remote Service and Support

With 24/7 boots-on-the-ground technical support and NOC monitoring of our network and your plugged-in assets, we promise reliability and security 24/7/365 in the field and office.

Why Work with INET?

- Over 100 O&G Clients Served
- 30+ years remote comms experience
- 24/7 Service and Support
- 130,000+ square miles of coverage
- Access to Emerging Technology
- Cross-Industry Applications

Working in a remote area? iNet keeps you connected reliably and securely in the remotest of locations.

iNet delivers the same level of reliability, availability, and throughput previously available only in corporate data centers and large downstream, highly automated facilities. Whether you need voice, internet, systems integration or IIoT, iNet has you covered.
