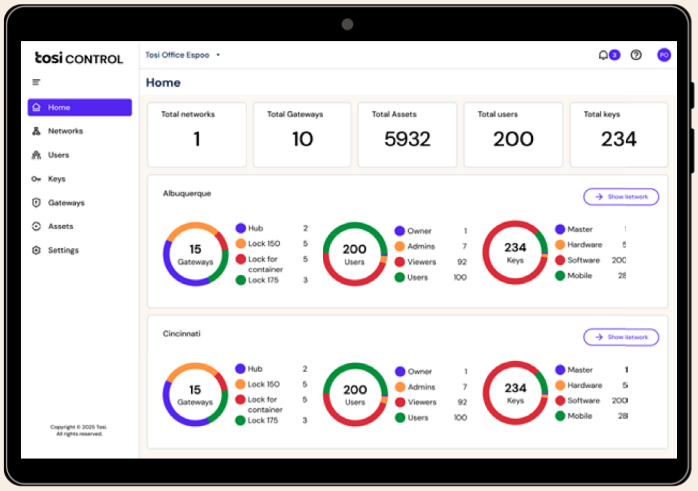
Connect, Visualize, Control.
Secure OT that scales.

DATASHEET

THE TOSI PLATFORM

Visibility and control from a single console



The entire platform is managed through Tosi Control, a cloud-based console for fleet visibility, monitoring, and management

SECURE OT THAT SCALES

Your OT environment is sprawling—assets across sites, connections you can't see, devices going offline without warning. The Tosi Platform combines industrial-grade hardware and cloud-based software to solve this. Tosi Gateways deploy at remote sites to create encrypted tunnels without network changes. Users connect via physical Tosi Keys or software Tosi Clients. Tosi Hub scales connectivity across thousands of sites, while Tosi Control provides centralized visibility and management. For advanced monitoring, Tosi Insight adds real-time asset discovery and threat detection.

PLATFORM COMPONENTS

Tosi Control	Cloud-based console for visibility, monitoring, and management. SSO and REST APIs included.
Tosi Gateways	Industrial-grade hardware at OT sites. Encrypted tunnels without network changes.
Tosi Keys & Clients	Plug-and-play user authentication. Available as hardware, software, or mobile.
Tosi Hub	VPN concentrator in your cloud or data center. Scales to thousands of connections.
Tosi Insight	Software-based module within Tosi Control for real-time asset discovery, behavioral analytics, and threat detection.

ENTERPRISE-GRADE SECURITY

- Zero-trust architecture
- AES-256 end-to-end encryption
- Outbound-only connections
- No open inbound ports
- Identity-based access controls
- No private keys retained by Tosi
- Enterprise-grade encryption protects your data at every step; we never access or store your data
- Design, development, and support process/function are certified according to ISO/IEC 27001:2022

WHY CUSTOMERS CHOOSE TOSI

Deploy in Minutes

No static IPs, no firewall changes, no exposed addresses

Scale Without Rearchitecting

Add sites, users, or capabilities as you grow

One Platform

Replace multiple point solutions with unified control

Compliance Ready

Audit trails and capabilities supporting EU Cyber Resilience Act

Ready to connect, visualize, and control your OT environment?
Let's find the right solution for your needs.

CHOOSE THE RIGHT SOLUTION

STANDARD
Get Started

For organizations running daily OT operations at a single site.

INCLUDES:

- **Tosi Gateways**
- **Tosi Keys & Clients**
- **Tosi Control**

Plus: Secure remote access, Role-based access control, Connectivity monitoring and alerts, Standard operational exports.

SUPPORT:
Standard Support

PROFESSIONAL
Scale Up

For organizations managing multiple sites or distributed OT environments.

INCLUDES:

Everything in Standard, plus:

- **Tosi Hub**
  Multi-site management
- **Tosi Inventory**
  Asset Management

Plus: Full event lifecycle, Standard APIs.

SUPPORT:
Advanced Support
(phone, extended hours)

ENTERPRISE
Full Control

Fully available late 2026

For large enterprises requiring comprehensive OT governance, asset intelligence, and cyber resilience at scale.

INCLUDES:

Everything in Professional, plus:

- **Tosi Insight**

Plus: Compliance & Risk Management (including vulnerability management) and AI-assisted insights.

SUPPORT:
Premium Support
(priority handling, 24/7 option)
